

Driving payment innovation in the insurance industry

Evolving consumer requirements are shaping the future of payments in the insurance sector. When it comes to **perfecting the payments journey**, successful insurance businesses need to navigate challenges and recognise that a “one-size-fits-all” approach to insurance premium payments is no longer suitable; this is where Acquired.com can help.

Acquired.com can accelerate your business growth by optimising the end-to-end payment process from deposits through to renewals.

In addition to traditional card payments, we provide your customers with alternative payment options in order to make payments more convenient and maximise revenue opportunities for your business.

Optimising your payments ecosystem

Convenient premium payments

Our Pay by Bank solution provides speedy, transparent, and secure account-to-account payments. This minimises payment delays by allowing your customers to conveniently pay for premiums and special services via their bank account.

Multiple payment methods

Acquired.com offer both Apple Pay & Google Pay as part of our payment solution - improving your set up for taking payments and increasing collection success rates.

Control your flow of funds

With automated claim payout processes and better control over disbursements & the flow of funds, our banking services put you in control, helping move money faster and at a lower cost, supported with real-time updates.

Our Solutions

Streamline payment processing

Our partners can access all of their payments activity on a single platform, with a single integration, and being acquirer agnostic, we compile a single lens of your business activity.

Easily manage your funds

Our unique payment Hub is designed specifically to improve efficiency and enable highly informed decision making with useful dashboards and easy-to-use export functionality.

Maintain customer payment information

Our Account Updater service allows you take recurring payments without any complications caused by expired cards or updated account details. Automatic updates of stored cards help mitigate customer attrition and improve loyalty.

Key benefits of our approach

Unlock insights from your payments

Explore unique insights from transaction reporting, including explanations as to why transactions may have been declined. Benefit from optimal authorisation rates by using the most effective routing for payments.

Improve efficiency with automation

Our automated tools reduce manual processes. And real-time notifications provide instant updates about important transactional events.

A panoramic view of all transactions

View information relating to transactions, financials and fraud in one easily accessible portal; providing a real-time view of the payments landscape.
